

Final Project

The Stylist's Companion

Long-term Goal

- Fully functioning application tool for stylists
- Making the consultation process more visual for not just the stylist but the client as well.

Fulfilling Customer Needs

- To be able to show a client the style, cuts, colors and textures on their own face shape and skin tone
- This would simplify the consultation process by the client being able to see what the stylist was trained to see.

Next Steps of Action

- Preventing continuous image overlay
- Being able to move, stretch and shrink the styles to the client's photo
- To be able to filter the colors using RGB for the hair alone to see the potential colors on the client
